

NEXT GENERATION WORKFLOW EFFICIENCY

Innovative Multifunction Printers

A3

Print from anywhere, anytime with advanced wireless,
mobile and cloud technology

Itec C368 / C308

C368	36 CL PPM	36 BW PPM
C308	30 CL PPM	30 BW PPM

SIMPLICITY AND USABILITY FIT IN ANY WORKING ENVIRONMENT

MFP TO ALWAYS PROVIDE YOU A BETTER WAY, A COMFORTABLE WAY. THAT'S WHAT REALLY MATTERS.

PRODUCT DESIGN

The Itec C368 series adopts the easy and intuitive INFO-Palette design and smart user interface. This ensures the same user experience in any business situation through seamless operation whether from PCs, tablets or smartphones.

WIDGETS FUNCTION

Text boxes, icons, or GIF animations can be posted on the MFP operation panel like the sticky notes. These can be used to display office communications, MFP usage rules, or warnings.

9 INCH OPERATION PANEL

The 9 inch operation panel provides user friendly interface and intuitive operations. 4 hard menu keys at the bottom of the panel and the on-screen soft menu keys can allow user to register up to 9 commonly used functions such as copy, scan/fax, preview or soft numeric keypad

PRINT FROM ANYWHERE, ANYTIME WITH ADVANCED WIRELESS, MOBILE AND CLOUD TECHNOLOGY

MOBILE TOUCH

Mobile Touch Area is newly added on the operation panel. Mobile device connection is now possible via NFC (Near Field Communication) and Bluetooth LE (Low Energy)*1 technology. The connection will enable mobile features*2 such as pairing, print, scan, and user authentication. To execute these features, simply touch your device to the Mobile Touch Area then the PageScope Mobile application will do rest of the work.

*1 Optional Device Connection I/F Kit EK-609 is required.
*2 Android devices must be installed with Android 4.4 or later and NFC antenna that supports HCE (Host Card Emulation). For the iOS devices, iPhone 4s or later, 3rd generation or later iPad and iPad mini are compatible with Bluetooth LE.

STANDARD WEB BROWSER

The multi-touch UI in the operational panel can be used to display and print out web page content. It is convenient for print required portions of PDF files that can be viewed on websites, or to print maps for places you are about to visit.

WIRELESS LAN SUPPORT

The MFP becomes a wireless LAN Access Point*3 to allow direct wireless connection between mobile devices and printer. Devices brought into the office will be able to directly connect MFP and are securely separated from existing company LANs. PageScope Mobile will enable more convenient use, as wireless set up can be completed between a mobile device and printer simply by reading the QR code that is displayed on the machine panel.

*1 Optional Upgrade Kit UK-212 is required.

CONNECT INSTANTLY WITHOUT PRINT DRIVERS TO INDUSTRY STANDARD MOBILE DEVICES

AirPrint

Apple's standard printing system compatible with iOS 4.2 and Mac OS 10.7 or later. A compatible printer on your wireless LAN can be used.

Mopria Print Service

Wireless printing technology provided by Mopria Alliance. Allows you to print from devices installed with Android 4.4 or later.

Google Cloud Print

With the compatible software installed, you can print from any locations via the internet regardless of OS or device type.

- Google Cloud Print Setup and Google account registration are required.
- Optional Upgrade Kit UK-211 is required.

Print Service

Print directly via a wireless LAN from Android 4.4 or later installed devices.

PageScope Mobile

A genuine mobile print application to allow usage of wide range of functions such as duplex print, security print, staple and punch.

BUILT FOR OPTIMAL PERFORMANCE AND WORKFLOW EFFICIENCY

PLENTY OF PAPER FEED OPTIONS

The standard paper capacity of the MFP is 1,150 sheets. With the optional paper feed options, the paper capacity can be increased up to 3,650 sheet. The optional Large Capacity Unit will bring the maximum of 6,650*1 sheets to reduce overall MFP downtime caused by paper replenishment.

*1 When optional Paper Feed Cabinet PC-410 and Large Capacity Unit LU-302 are mounted.

MULTIFUNCTION FINISHER

The optional finisher allows you to perform many high level finishing functions such as three sheets stacked tri-fold, stapling, punching, and saddle stitching. User can produce internal documents more easily and professionally.

FIERY CONTROLLER

Optional Fiery Image Controller*2 for graphics applications can produce professional and high-level printing quality environment. The Fiery's various settings can be configured by using the MFP web browser.

* 3 Optional Fiery Image Controller IC-416, Video Interface Kit VI-508 and Upgrade Kit UK-211 are required.

DOCUMENTS DIGITALISATION

Paper documents can be scanned and converted into PDF and OOXML file formats. Choose a file format suitable for your work objective. To widen the potential for documents secondary usage.

- OCR processing enables text searching.
- Images and text can be reused in applications such as Microsoft Office.
- Optional Upgrade Kit UK-211 is required.
- * 3 Although pptx conversion is a standard function of this machine, optional i-Option LK-105 v4 or LK-110 v2, and Upgrade Kit UK-211 are required to use OCR.

EMPERON PRINTING SYSTEM

Emperon unified printing system is equipped with network printing functions as a standard feature. It provides a comfortable print experience in any office network environment regardless of OS types.

FLEXIBLE AND ADVANCED SECURITY TO PROTECT VALUABLE INFORMATION

AUTHENTICATION ON THE MFP MAIN UNIT

Authentication can be performed directly on the main unit. Detailed access control can be set up for each function including copy, print, scan, and fax*1.

* 1 Optional Fax Kit FK-513 is required.

IC CARD AUTHENTICATION

To authenticate*2 with various types of IC card*3. The authentication method also complies with SSFC (Shared Security Formats

Cooperation) standard. Besides the IC card, authentication can also be performed with any Android devices that are equipped with NFC antenna.

- * 2 Optional Authentication Unit AU-2015 is required.
- * 3 Compliant non-contact IC cards include FeliCa (IDm), SSFC, FCF, FCF (campus), FeliCa Private, and MIFARE (UID).
- * 4 Requires Android 4.4 or later that supports HCE (Host Card Emulation) or PageScope Mobile for Android v4.1 or later.
- * Optional i-Option LK-114 and Upgrade Kit UK-211 are required to be installed to each of the MFP.

TPM (TRUSTED PLATFORM MODULE)

Control the confidential information with a TPM (Trusted Platform Module) security chip which encrypts and decrypts any confidential data. The confidential information will be encrypted and stored only in the dedicated storage area in the chip. To avoid unauthorised reading from the outside.

* Optional i-Option LK-115 v2 is required

BIOMETRIC AUTHENTICATION

Your finger veins becomes the most accurate authentication tool. The biometric authentication is easy to implement but

offers very high-level security.

* Optional Biometric Authentication Unit AU-102 and Working Table WT-506 are required.

SERVER-LESS PULL PRINTING

Paper documents can be scanned and converted into PDF and OOXML file formats. Choose a file format suitable for your work objectives. This allows the user to build a server-less pull printing with ease and low introduction costs. This widens the potential for documents secondary usage.

- A pull printing system consisting of a maximum of 10 MFPs can be created. It is necessary that all corresponding MFPs be in the same network.
- * Optional i-Option LK-114 and Upgrade Kit UK-211 are required to be installed to each of the MFP.

HDD MIRRORING

Supports "Mirroring" which synchronises the main HDD data and the backup HDD data in real time. In the event of main HDD failure, operation automatically switches to the backup HDD which will drastically reduce the risk of data loss.

* Optional HDD Mirroring Kit HD -524 is required.

INNOVATION HELPING EVERYONE TO REACH THEIR FULL POTENTIAL

SCREEN DISPLAY ENLARGE AND COLOUR REVERSAL FUNCTIONS

The screen display enlarge function enlarges the text on the buttons. The screen display colour reversal function reverses the display colour while maintaining the same contrast ratio. For better visibility to help elderly users and users with low vision.

DETACHABLE PAPER CASSETTE

Paper cassette of the MFP is detachable. Jammed paper remaining inside of the MFP can be easily removed to reduce MFP downtime.

ENVIRONMENTAL CONTRIBUTION IS ALWAYS TOP PRIORITY

USAGE OF THE RECYCLED MATERIALS

Increased use of recycled PC/PET has raised the PCR ratio*1 to approximately 70%. This recycled material accounts for more than 25% of the weight ratio of the total resin volume in the main unit. The ratio of recycled materials in the surface area of the machine has increased to approximately 78%.

* 1* PCR (post-consumer recycling): the ratio of municipally recycled materials used in the recycled materials.

TOP CLASS POWER CONSUMPTION AND TEC VALUE IN ITS CLASS

The MFP CPU power turns off during the sleep mode. This results in the top class 0.5 W power consumption ratio (during the sleep mode). The TEC value has also been reduced approximately 5-18%. More CO2 emissions from MFP can be reduced.

Comparison of TEC values (in Europe and other regions) of previous models (Itec C364e/C284e) and the Itec C368 series.

* Values for 220-230 V

* TEC values applied to the International Energy Star Program Version 2.0

Yearly CO2 emissions:

TEC value x 52 weeks x emission factor
(From November, 2011 press release by Japan's Ministry of the Environment.)
