

Outsource your IT for managed digital transformation.

IT INFRASTRUCTURE

Tailored Infrastructure Implementation and Management Services

We deliver safe, secure, and reliable IT Solutions that guarantee predictable availability for your organisation.

We offer custom solutions and deployment options that cater to your current needs and long-term growth objectives. We can also provide on-going support to keep your business running – and thriving. What is more is that we offer these hardware and software solutions as-a-service. You can offset capital expenditure with a fully managed monthly service which includes hardware and software deployment, maintenance, upgrades and updates under a tailored service level agreement (SLA).

Ensure that your hardware, software, facilities, and network solutions are optimally integrated to benefit from your IT Resources. Maximise profitability and avoid serious downtime due to hardware failure. The right infrastructure enables systems to run at peak-performance for increased productivity.

Custom Infrastructure Models

We will assess and get to know your business to advise and assist in deploying the best physical, virtual, cloud or hybrid model to meet your requirements.

We can match the best infrastructure model for hardware performance, sustainability, and elasticity.

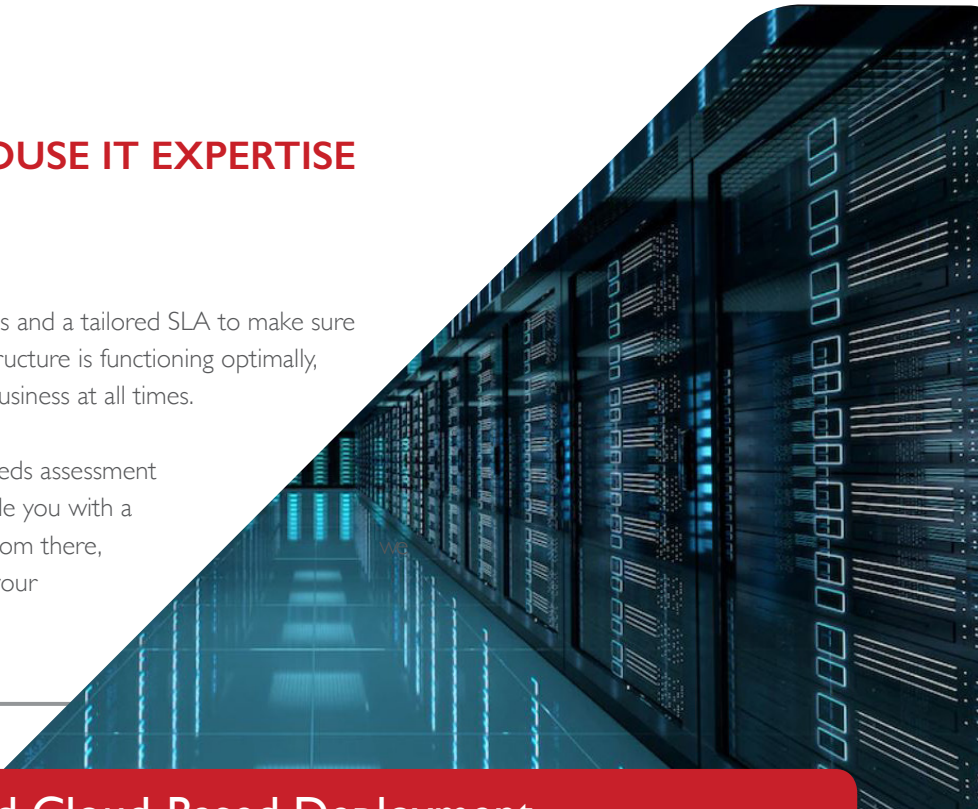

WHY ITEC IT?

COMPREHENSIVE IN-HOUSE IT EXPERTISE

Low-risk, high output systems

We will work with you on a project basis and a tailored SLA to make sure that your hardware and software infrastructure is functioning optimally, minimising the amount of risk on your business at all times.

Our team of experts will carry out a needs assessment and get to know your business to provide you with a range of suitable deployment options. From there, we will supply, install and support all of your hardware and software needs.

Virtual and Cloud-Based Deployment

INFRASTRUCTURE AS A SERVICE (IaaS)

Hosted physical infrastructure components provisioned on-demand according to your current needs.

- Reduce the number of physical servers needed and enjoy use of the latest, most powerful storage, servers and networking technology.
- Elastic, infrastructure is flexible and can scale up or down, adapt according to business spikes.
- Fixed monthly fee with no fluctuating costs for maintenance and repairs.

SOFTWARE AS A SERVICE (SaaS)

Software licensing and distribution supplied on-demand and accessible via the cloud. Add or remove users as needed and eliminate the need to install and update software on your physical devices.

- Ultimate convenience with wholly managed service accessible via your browser.
- Reduced costs for hardware maintenance and software upgrades.
- Effortless system management.

Competitive Purchase Options with Itec Finance

We offer competitive in-house outright purchase options for on-site infrastructure, architecture, hardware procurement, and deployment that provide increased security.

- Absolute control of maintenance and optimisation.
- Bespoke integration.
- In-house support.

MANAGED BUSINESS SERVICES
