Wireless Handset (Optional)

Wireless Dongle (Optional)

Wireless Dongle (Optional)

The Fanvil X3S 2SIP VoIP phone is a feature-packed device with HD voice, two network interfaces, and a 128 x 50 graphic LCD display. It offers caller ID display, hands-free convenience with an RJ9 headset port, and can be powered by an external supply. Ideal for high-quality VoIP communication.

The Fanvil X4U offers two high-resolution color displays (320x240) for easy access to instructions, enhancing productivity in enterprises. With a Harman speaker and G.722/Opus codecs, it provides immersive HD audio in both high and low network bands. Ideal for improved flexibility and audio experience at work.

The X210 is a high-end IP phone designed for handling medium to high call volumes in enterprise settings. It features a 4.3" main color display with 10 DSS keys and two 3.5" side color displays with up to 96 DSS keys. With HD audio, Bluetooth, Wi-Fi, and other advanced features, it offers vast productivity for users.
