

ENTRANCE & SPORTS FIELDS

Secure & Monitored Outdoor Educational Facilities

Security and traffic control are key priorities at any educational institution's entrance, parking area, and sports fields. A combination of surveillance and access-control solutions paired with smart, connected digital displays make for safe outdoor areas of any educational institution.

Itec's outdoor security solutions include boom gate access control, intercoms and license plate recognition cameras to regulate vehicle and foot-traffic access into the facility. Sound-enabled CCTV PTZ cameras and CCTV bullet cameras provide intelligent surveillance tools to mitigate risks, while solar CCTV cameras ensure always-on security. Our communications solutions include PBX-integrated bullhorn loudspeakers for clear communication in outdoor areas. In addition, firewall-secured WiFi provides reliable and protected internet connectivity, and outdoor electronic commercial displays enable dynamic content sharing and announcements.
