

# MEETING ROOM & CANTEEN

Flexible Staff Meeting Space with Catering Access

The auditorium-style lawyers' meeting room often requires flexible seating and audio-visual conferencing capabilities, with access to catering facilities that double up as a canteen. This multi-purpose space integrates Unified Communications and security solutions with the benefits of a well-managed leisure area, including amenities for network access.

Itec can outfit the sectioned-off meeting area with Unified Communications, video conferencing, wireless interactive smartboards and audio-visual equipment. In the adjoining leisure area and canteen, secure WiFi access, room controls, and digital displays give employees a space to unwind and enjoy a meal enabled by mobile communications.

Access to these areas are controlled with biometrics, while CCTV, a wireless alarm system and panic button mitigate security risks.

Access and cost-controlled printing ensures a seamless flow of information in the meeting area, since lawyers require both digital and hard copy documents to best fulfill their roles and serve their clients. Automated workflow and integrated software ensure transparent and auditable client management, with real-time billing assignment.
