PARKING ENTRANCE

Secure, Access-Controlled Parking Entrances

Security and parking management are key priorities for retail parking and entrance areas. Safety, communications, and analytics-driven data are provided via access-controlled, AI-integrated camera surveillance for security and foot traffic management, portable communications solutions, and digital outdoor displays.

Itec provides a unified solution for personnel to communicate efficiently using portable wireless handsets and unified communications applications. Stores efficiently share information with customers via digital displays and firewall-protected public-access WiFi.

Our retail Parking Entrance security solution provides automated and controlled access to vehicles and people with AI-integrated and analytics-driven camera surveillance, boomgates, ANPR License Plate technology, facial recognition, and retail tag detection at store entrances and exits.
